25X1

25X1 1. [redacted] points of interest in Szczecin

[See Annex A:]

Point #1. Warehouse: Concrete, 70 m. long, 30 m. wide, six to eight meters high, tin-covered sawtooth type roof consisting of three peaks. There were two narrow gauge tracks leading into warehouse, also one set of tracks on either side of warehouse, with unloading platforms, the length of warehouse, at each point. Each track had accommodations for unloading four 15 to 20 ton box cars. There were offices and storage space in this warehouse. Loose ammonia in salt form was stored in this warehouse 1½ m. high. [redacted] the warehouse could store 2,000 to 3,000 tons of ammonia.

25X1

25X1

[redacted] the ammonia came from East Germany and was later sent to the port of Szczecin for export. The warehouse was guarded by an old watchman. There were other warehouses and tracks [redacted]

25X1

[redacted] This area was called Central Port Station (Dworzec Portu Centralnego).

#2. Merchant Marine Port: [redacted]

25X1

[redacted] This port was called Starowka.

#3. Merchant Marine Port: [redacted]

25X1

[redacted] The crates contained machinery. This was a large port called Odra.

#4. Szczecin Shipyard (Stocznia Szczecinska) [redacted]

-2-

25X1 Point #5. Phosphate Factory: [redacted]  
 25X1 [redacted] There was a lot of yellow smoke around the area and a strong odor for some distance.

#6. Stoleczyn Foundry (Huta Stoleczyn): Located 12 km. north of Szczecin in town of Stoleczyn /5330N-1436E/. The foundry melted iron ore into pig form.

25X1 #7. Warehouse: [redacted] it was 60 to 70 m. long, 30 to 40 m. wide, 10 stories high; shed type roof. This warehouse was used for storage of grain and corn. Ships docked next to the warehouse and the grain and corn were unloaded through ducts by means of compressed air.

#8. Fish Warehouses: Called the New Port (Nowy Port). It consisted of three old wood warehouses, 10 to 12 m. long, 5 to 6 m. wide, 3 m. high, tar paper, gable roofs. Used for temporary storage of fish products.

#9. Warehouse: Wood, 80 m. long, 40 m. wide, 8 to 10 m. high, sawtooth type tin covered roof. The warehouse was used for storage of loose potassium salt and bagged ammonia in salt form. This warehouse was to be turned into storage for canned goods in early 1952.

25X1 #10. Tank: Large brown tank standing in vertical position guarded by an armed Soviet soldier. [redacted]

[redacted] it contained alcohol.

25X1 #11. Chemical Plant: [redacted] dyes and machine oils were produced here. This installation was connected within the same building complex as Point #12 below.

25X1 #12. Soviet Barracks: [redacted]  
 25X1 [redacted] There were railroad tracks in this area and [redacted] 15 to 20 tons of coal piled near barracks. This area was guarded by an armed Soviet soldier.

25X1 #13. Lumber Yard: [redacted]  
 lumber piled in the yard.

#14. Factory: Production was tile roofing, tile pipes, and cinder blocks. This small factory was called Kujoty and employed 35 workers.

#15. Railroad Bridge over canal and street: Steel girder constructed on timber piles over water and all steel construction over the street, 60 m. long, 5 to 6 m. wide, consisting of 2 narrow gauge tracks. Bridge level was 4 to 5 m. above water and 3 m. above the street. An iron railing on the bridge over the street was 10 m. long and 3 m. high. The bridge was built since World War II and was guarded by an armed railroad guard.

2.

25X1

[redacted] electric power plant southeast of Zabrze /Point #1.

25X1

Annex B. [redacted]

[redacted] there was one large brick chimney and several smaller ones.

[redacted] this plant supplied electrical power to Zabrze as well as to the coal mines in the surrounding area.
